

# Components of BURY Handsfree Solutions

The purpose of this spread-sheet is to identify all the products required to create a complete handsfree solution with a bluetooth car-kit and cradle which secures the phone, charges it continuously and provides external antenna for boosted signal. There are examples for just 2 phones - one with the Universal cradle and the other with a dedicated cradle. Also included are the BURY CP1000 and CP1100 Fixed In-Vehicle phone solutions.

## Bury car-kit solutions - examples
